

The Future of Manufacturing And Implications for Erie

14th ERIE Conference: Tuesday, August 1

What is the future of manufacturing and the implications of that future for Erie? Will manufacturing remain a vital part of the national and local economies? How are technology and automation influencing this sector, and how will we meet the workforce requirements of tomorrow? Join us in examining these issues at the Economic Research Institute of Erie's annual conference for community leaders and interested citizens.

Hear from local leaders, from industry representatives who have played an integral role in transforming manufacturing, and from an expert on trends in advanced manufacturing. Together, we'll explore the challenges and opportunities of adapting to this evolving sector of the economy. Be part of the conversation about the future of manufacturing and its potential impact on Erie.

When: 8:00 a.m. to 2:30 p.m.

Where: Burke Center, Penn State Behrend

To Register: Call 814-898-6716 or go to ERIEdata.org
