

Automation and AI in the Workplace: Impact and Lessons for Executive Decision-Making

16th ERIE Conference: Wednesday, July 24

How are technology, automation, and artificial intelligence transforming the workplace? What are the opportunities and challenges – and how will such rapid technology change affect decision making? Are we ready to take on a “brave new world”? Join us in examining these issues at the Economic Research Institute of Erie’s annual conference for community leaders and interested citizens.

Hear from local professionals in executive training sessions that focus on the impact of automation on business operations and HR processes – and from experts who will address the economic, scientific, and social ramifications, both positive and negative, of automation and AI. Be part of the discussion as we explore these uncharted waters and the role technology will play in Erie’s future.

When: 8:00 a.m. to 3:00 p.m.

Where: Burke Center, Penn State Behrend

To Register: Call 814-898-6168 or go to ERIEdata.org
