Cybersecurity – Government Contracts

DFARS CYBERSECURITY REQUIREMENTS

Robyn Young, Government Contracting Manager
Northwest Commission APEX Accelerator
395 Seneca Street
Oil City, PA 16301
(814)677-4800 x 130

Department of Defense Office of Small Business Programs (DoD OSBP)

Formerly known as PTAC

The **Procurement Technical Assistance Program (PTAP)** was authorized by Congress in 1985 in an effort to expand the number of businesses capable of participating in the government marketplace.

Administered through the **Department of Defense**, the program provides matching funds through cooperative agreements with state and local governments and non-profit organizations for the establishment of PTACs to provide procurement assistance.

This APEX Accelerator is funded in part through a cooperative agreement with the Department of Defense.

APEX ACCELERATORS

DOD OSBP APEX ACCELERATORS

**97 APEX
Accelerators
with over
300 offices**

This nationwide program has one common GOAL: To bring Gov't Buyers together with U.S. Suppliers

Each APEX's mission is to increase government contracts in the region they serve

FREE Services:
One-on-One Counseling & Training

DoD OSBP APEX Accelerators

(formerly known as PTAC - Procurement Technical Assistance Center)

Located in every state in the United States – was authorized by congress in 1985 in effort to expand the number of businesses capable of participating in the government marketplace.

Northwest Commission APEX ACCELERATOR

- Service Region: Clarion, Crawford, Erie, Forest, Mercer, Lawrence, Warren & Venango Counties
 - All Services are **FREE** of charge
 - Assist with Federal, State and Local government markets
 - To become a client - request a Client Enrollment Form
 - Visit website for more information:
<https://www.northwestpa.org/government-contracting/>

This APEX Accelerator is funded in part through a cooperative agreement with the Department of Defense.

NIST Cybersecurity Framework

Cybersecurity Framework Attributes

NIST

The NIST Cybersecurity Framework (CSF) helps organizations reduce their cybersecurity risks and is widely recognized as foundational to securing organizations & technology.

- Common and accessible language
- Adaptable to many technologies, lifecycle phases, sectors and uses
- Risk-based
- Based on international standards
- Guided by many perspectives – private sector, academia, public sector
- Align legal/regulatory requirements and organizational and risk management priorities

NIST Quick Start guide

<https://csrc.nist.gov/Projects/cybersecurity-framework/nist-cybersecurity-framework-a-quick-start-guide>

CISA- Cybersecurity and Infrastructure Security Agency

SHIELDS UP

<https://www.cisa.gov/shields-up>

Due to the recent threats of malicious cyber activity from Russia, the U.S. Government has taken measures to provide resources and tools to the private sector which includes the new **Shields Up campaign**.

- **Free Cybersecurity Services and tools**
- **Technical Guidance**
- **Sign up for CISA's Free Cyber Hygiene Services**
- **And much more**

Organizations can also report anomalous cyber activity and/or cyber incidents 24/7 to report@cisa.gov or (888) 282-0870.

DoD Cybersecurity UPDATES

- What DoD contractors need to know to be compliant
- What the heck is going on with CMMC?

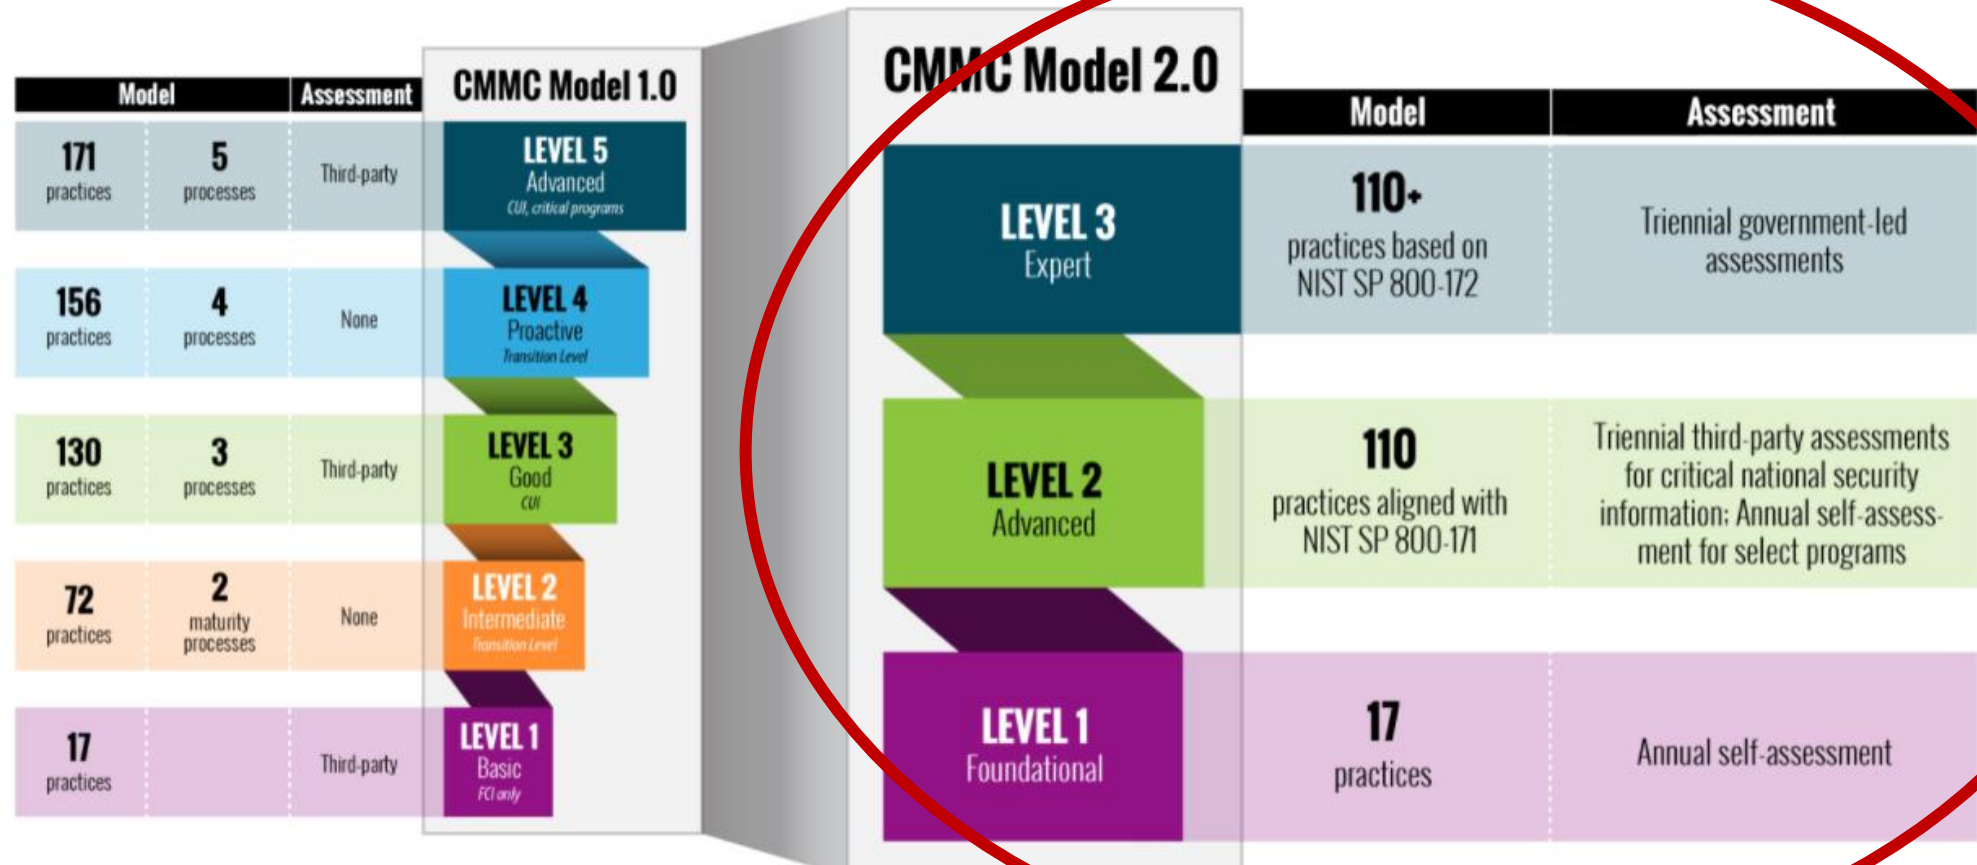

Cybersecurity for the Federal Government Contracting

- **FAR 52.204-21** Basic Safeguarding of Covered Contractors Information Systems –
 - 15 Controls - listed in the clause
 - Requires a Flow-down to subcontractors
 - Federal Contracting Information (FCI)
 - Examples – Contract Performance Reports, Proposal Responses, Email exchanges
- **DFARS 252.204-7012** Safeguard Covered Defense Information (CDI or CUI)
 - 110 Controls – NIST SP800-171
 - Requires a Flow-down to subcontractors handling CUI
 - Controlled Unclassified Information (CUI)
 - Examples – technical drawings, intellectual property, anything that would be beneficial to our adversaries.
- **DFARS 252.204-7019/7020** – includes the above clause and requires contractors to Self-Assessment using the NIST 800-171 Self-Assessment
 - Must enter assessment score in the Supplier Performance Risk System (SPRS)
 - Requires a Flow-down to subcontractors handling CUI
 - Could be required to go through an Assessment from the DIBCAC/DCMA
- **DFARS 252.204-7021** – Cybersecurity Maturity Model Certification (CMMC)
 - Requires Contractors to become certified using an approved CMMC Assessor (Level 1, 2 or 3)

DFARS Cybersecurity UPDATES – What Contractors need to know

KEY FEATURES OF CMMC 2.0

Office of the Under Secretary of Defense - Acquisition & Sustainment

<https://www.acq.osd.mil/cmmc/about-us.html>

DFARS Cybersecurity UPDATES – What Contractors need to know

CMMC is currently **NOT** required and NOT in contracts. (Only a select few Pilot Contracts)

The change to CMMC from 5 levels to 3 levels was due mostly to industry feedback.

On November 5, 2021 CMMC 2.0 was published and once codified through rulemaking, DoD will require companies to follow the revised CMMC framework.

The Rulemaking process (including public comment) can take anywhere from **9-24 months** to become a contract requirement.

Costs to implement CMMC – DoD will publish a comprehensive cost analysis associated with each level as a part of the rulemaking.

DFARS Cybersecurity UPDATES – What Contractors need to know

Your APEX counselor will have additional resources and tools to assist your company – Feel free to schedule an in-house training with an APEX counselor to train your company's cyber team.

Schedule a meeting with APEX Counselor

Assemble a Cyber Team

Evaluate your current situation

1. Do we handle CUI
2. Where is it processed, transmitted and stored?
3. Who has access?

Perform a Self-Assessment using the NIST SP800-171 Assessment

Get a PIEE account – Establish a CAM & SPRS Roles

Consider working with a local IT firm to assist with implementing controls

SPRS Role – enter your Self-Assessment Score

Continue to implement controls and stay informed with the latest information

PROJECT SPECTRUM

Project Spectrum is a comprehensive, cost-effective platform that provides companies, institutions, and organizations with cybersecurity information, resources, tools, and training. Our mission is to improve cybersecurity readiness, resiliency, and compliance for small/medium-sized businesses and the federal manufacturing supply chain. – Supported by the Department of Defense.

Self-assessment tools and other resources

The screenshot shows the Project Spectrum website interface. At the top, there is a navigation bar with the Project Spectrum logo and links for Cyber Readiness Check, Community, Dashboard, Contact, My Account, and Logout. Below this is a secondary navigation bar with links for Resources, Partners, Calendar, Tool Reviews, Cyber Circuits, About CMMC, Online Courses, Training Videos, and Useful Links. The main content area is titled "CMMC Level 1" and features a progress indicator with six circles labeled AC, IA, MP, PE, SC, and SI. The "AC" circle is highlighted, indicating the current assessment section. Below the progress indicator, the section is titled "Access Control" and contains a question: "1. Do you limit system access to authorized users, processes acting on behalf of authorized users, and devices (including other systems)?" The question is followed by five statements, each with four radio button options: Yes, No, Not Applicable, and Answer Later. The statements are: "Authorized users are identified.", "Processes acting on behalf of authorized users are identified.", "Devices (and other systems) authorized to connect to the system are identified.", "System access is limited to authorized users.", and "System access is limited to processes acting on behalf of authorized users." Below this, there is a second question: "2. Do you limit system access to the types of transactions and functions that authorized users are permitted to execute?" followed by two statements with the same four radio button options: "The types of transactions and functions that authorized users are permitted to execute are defined." and "System access is limited to the defined types of transactions and functions for authorized users."

The screenshot shows the Project Spectrum website interface. At the top, there is a navigation bar with the Project Spectrum logo and links for Cyber Readiness Check, Community, Dashboard, Contact, My Account, and Logout. Below this is a secondary navigation bar with links for Resources, Partners, Calendar, Tool Reviews, Cyber Circuits, About CMMC, Online Courses, Training Videos, and Useful Links. The main content area features a large blue shield icon with a circuit board pattern. Below the icon, the text reads: "How secure is your organization? Select the NIST 800-171 or CMMC Compliance Tool to assess your readiness to meet the requirements." There are three buttons: "CMMC LEVEL 1", "CMMC LEVEL 2", and "NIST 800-171". At the bottom, there is a disclaimer: "By using these tools you agree to our disclaimer."
